

Serial Code-Operated Switch (SCOS-2)

Use software commands
to control two serial devices.

FEATURES

- Switch between two serial devices—locally or remotely.
- Switch ports via a special “trigger” character or by flipping a toggle switch.
- There’s no unintended triggering, either—no matter what data you’re sending.
- Internal DIP switches enable you to select word format, speed, DTE/DCE, and trigger character.
- Async, full-duplex operation.

Switch between two serial devices—without worrying about unintended triggering.

Technically Speaking

Code-operated switches.

BLACK BOX® Code-Operated Switches enable one device to control up to 64 connected devices, depending on the code-operated switch. For instance, you can use one modem—not eight—to control eight devices. Code-operated switches are ideal for applications that require remote switching for file sharing or monitoring. Use code-operated switches for:

- Remote programming. Call in via remote sites to access servers, logic controllers, or any devices that require programming.
- Diagnostics. From your master control room, you can probe servers and run diagnostics.

TECH SPECS

Leads Supported — 1–8 and 20

Switches — (1) 3-position toggle switch (Mode 1/Disable/Mode 2); (1) toggle switch (code-activated, manual Channel A, manual Channel B); Internal DIP switches: Word Format, Speed, DTE/DCE, and Arming Character

CE Approval — 230-VAC version: SW281AE

Interface — RS-232, full-duplex, asynchronous

Connectors — (3) DB25 F

Power — 115 VAC, 60 Hz, 11 W (230-VAC version on request)

Size — 2.2"H x 8.2"W x 11.2"D (5.6 x 20.8 x 28.4 cm)

Weight — 2.2 lb. (1 kg)

Item

Serial Code-Operated Switch (SCOS-2)

Code

SW281A-R2

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor’s tech support.
- The so-called “tech” can’t help you or gives you the wrong answer.
- You don’t have a purchase order number and the tech refuses to help you.
- It’s 9 p.m. and you need help, but your vendor’s tech support line is closed.

According to a survey by Data Communications magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn’t worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don’t waste time and money—call Black Box today.
